

Which devices are covered by the Service Package Protect?

Joachim Ulbrich - 2025-07-14 - [Product support](#)

The Service Package Protect is already included in the leasing rates and is automatically provided for certain device types as part of OwnIT@home. It offers support in the event of defects or damage and helps minimize downtime. Coverage depends on the device type.

☐ **Covered by the Service Package Protect:**

The Service Package Protect applies to the following main devices:

- Smartphones
- Smartwatches
- Tablets
- Notebooks / Laptops
- Desktops / PCs / Workstations / Mini Desktops / All-in-One PCs
- Projectors
- Graphic Tablets

These devices are classified as “main devices” and are automatically covered by the Service Package Protect.

☐ **Not covered by the Service Package Protect:**

The following devices are not covered by the Service Package Protect:

- Wearables such as headphones
- Monitors / Displays / Head-Mounted Displays
- Printers & Scanners
- NAS systems / Storage servers
- Accessories (e.g. input devices, speakers, power banks, webcams)
- Network devices

These devices are not part of the Service Package Protect – not even as part of a bundle.
